

Sealing Global - Servicing Local

Lamons Technical Symposium Tour

2012

A FEATURE OF
LAMONS UNIVERSITY
TECHNICAL TRAINING PROGRAM

Lamons is pleased to announce our technical training Symposium tour which is a feature of Lamons University. For years, Lamons has offered training programs, providing the latest information in sealing and bolting technology to our customers. This Symposium tour will provide an opportunity to receive a unique learning experience. With our widely acclaimed class presentations, participants will benefit from the latest in gasket and fastener fabrication and usage techniques.

Formalizing these training modules and combining them to create a comprehensive training program has been the result of efforts from Lamons' Engineering Department, with assistance from Sales and Marketing staff. The focus of these symposiums is heavily geared toward engineering and technical topics so that the participant leaves with a firm grasp on gaskets and fasteners and how the components interact in a bolted joint assembly.

- Non Metallic Gasketing
- Semi-Metallic Gasketing
- Metallic Gasketing
- Bolting and Fasteners
- Installation Techniques
- Load Indicating Fasteners
- Specialty Bolting
- Specialty Machined Products
- Premium Lubricants
- Current Industry Trends
