**Re:** Certification(s) 6A-0112.1

API's goal is to complete the renewal process to coincide with the expiration date of your certification(s). However, the process has been delayed. You can verify the status of your API certification(s) on the API Composite List by using the following URL:  
[http://compositelist.api.org/CompanyList.ASP?IDS=Facility\\_ID=1752](http://compositelist.api.org/CompanyList.ASP?IDS=Facility_ID=1752)

**The expiration date of your current certification(s) has been extended until January 29, 2012. Please note, if your organization has a ISO 9001 Certificate of Registration, API cannot extend the expiration date per the requirements of our accreditation body (ANAB).**

If your organization has not submitted the required documentation, please do so at this time. However, if your audit has not been scheduled and/or performed, an API auditor will contact you shortly.

Just as the demand for oil and natural gas has increased over the last several years, so has the call for monogrammed equipment and for API Certification. As a result, our processing times have increased considerably, but we are working very hard to keep up with new demands and we are taking all steps possible to reduce turnaround time.

Very truly yours,
