

Sealing Global - Servicing Local

Lamons Self-adhesive Graphite Tape

"Premium Flexible Graphite Tape with Adhesive Backing"

Lamon self-adhesive graphite tape is provided in a unique dispenser that allows for easy field access and prevents waste associated with loose rolls. Furnished with a strong self-adhesive backing strip to facilitate installation as a form-in-place gasket.

Lamons self-adhesive graphite tape can be used as filler packing for valve stuffing boxes or pumps, facing for metal jacketed gaskets and field repairs for CMG's, Kammpro styles, and RTJs. This tape has many other general uses for industrial sealing.

Lamons self-adhesive graphite tape is produced from high purity graphite with no fibers, fillers, binders or organics that cause weight loss at elevated temperatures.

Material Properties:

Length	32ft (10m)
Width	0.5in (12.7mm)
Thickness	0.02in (0.5mm)
Bulk Density	70 lb/ft ³ (1.1g/cc)
Tensile Strength	> 500psi (3.45MPa)
Compressibility	40%
Recovery	14%
Creep	< 5%
Carbon Content	> 98%
Moisture	< 1%
Ash Content	< 2%
Sulfur	< 500PPM
Leachable Chlorides	< 50PPM
