

Lamons Introduces New Hydrogen Gasket

The proven gasket focuses on reliability and safety of maintaining a tight seal for hydrogen applications

HOUSTON, TX (October 10, 2023) – Lamons® launched today the CorrLock™ gasket to address the need for reliable and safe sealing solutions for the hydrogen market. The PFAS-free solution is based on the field-proven CorruKamm gasket and made with a dual seal for less downtime, improved operational efficiency and significant cost savings.

“The CorrLock gasket will change the industry standard for hydrogen and industrial gas applications,” said Marc Roberts, CEO, Lamons. “We custom designed this gasket to go above and beyond the industry and environmental standards for leak rates, performance and temperature ratings to provide our customers with a superior product as they continue through the energy transition.”

The CorrLock gasket can withstand temperatures from -253°C (-423°F) to 260°C (500°F).
