Lamons is one of the leading gasket, bolt, and hose assembly manufacturers in the world. We provide industry-leading safety sealing and attachment solutions through our quality products, technical expertise, and exceptional support.

Our 20+ global locations support your needs 24/7/365.

THE INDUSTRIES WE SERVE

Engineering, Procurement, and
Construction (EPC)

OUR CAPABILITIES

Gaskets

- Spiral wound
- Kammprofile
- Ring-type joint (RTJ)
- Heat exchanger
- Corrugated metal
- Jacketed metal
- PTFE

Isolation Gaskets and Flange Kits

- General application
- Critical and extreme applications
- Fire-safe applications

VALUE REALIZATION

Simply selling products is not enough. We understand that your operation is much more than gaskets, seals, bolts, and hoses. You need a reliable partner who will stand behind their products when day-to-day challenges require real solutions.

We have developed numerous value-added services and programs that are designed to enable our customers to do more with less, regardless of the challenges.

What matters most to us is being there for our customers whenever they need us. We work hard to be the local team that makes doing business simple and stress-free for our customers.

SERVICES AND SUPPORT

TruFAST™ Re-engineering Services – Our Field-Acquired Seal Technology® (FAST) allows us to reverse engineer undocumented gaskets in the field and produce them as new, manufactured products with minimum time and effort.

Engineered Solutions – We custom manufacture gaskets, machine specialty parts, and prototype with our extensive inventory of centrifugal castings, forgings, and plates.

Field Support – From our 21 global locations, our teams are ready to assist you with troubleshooting, failure investigations, on-site support, bolt-up protocols, critical gasket recommendations, expert field measurements, and much more.

Training Programs – From tailored in-person training sessions to monthly webinars, our engineers provide the knowledge to get the job done.

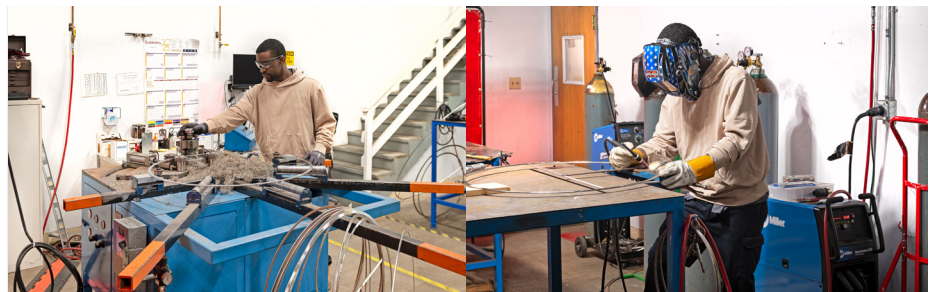

TECHNOLOGY OFFERINGS

eCatalog – Streamline your purchasing process with our site-specific online ordering system for the gaskets, fasteners, hoses, and specialty machined components you need to keep your operations running. Everything is simplified – from pricing and approvals to purchasing and shipping.

Drawings Online – Catalog your unique components in our online, site-specific repository. Reference drawings with dimensions are also included, enabling you to purchase all components individually as needed or together as a kit. Site-specific spare parts are cataloged with part numbers and current pricing. As part lists and equipment change, they are easily edited in real time. When you are ready to purchase parts, creation of a requisition in your enterprise resource planning (ERP) system can be automated with the click of a button.

Vendor-Managed Inventory (VMI) Programs – Use our warehouses or yours to store your inventory. Whether you prefer to own the inventory or have it provided on consignment, our VMI system simplifies management, replenishment, and tracking of inventory using barcode scanning for material receipt and issue. Enjoy real-time visibility into stock levels and reserve materials for individual work orders. Integrate our VMI with your ERP system to automate and simplify the procurement process even further.

Lamons-IsoTek® Isotorque™ App – Our industry-first mobile app for iOS and Android allows you to perform quick torque calculations in the field, change friction factor, access instructions for isolation flange installation and test procedures, and report issues in the field on the go.
